

KIRTI KUMAR SAHU

Software Architect, Frontend

Bengaluru, India | +91 9039909300 | kirtisahu05@gmail.com | [linkedin.com/in/kirtisahu05](https://www.linkedin.com/in/kirtisahu05) | github.com/kirtisahu05

SUMMARY

Software Architect – Frontend with 10+ years of experience designing, building, and scaling high-performance web platforms for consumer and B2B products. Currently own frontend architecture at CoffeeWeb for a mobile-first PWA serving 200,000+ users across 175+ countries. Proven track record architecting systems from scratch (React, Next.js, Vue.js, Node.js), owning production reliability, CI/CD, and testing, and hiring and mentoring frontend teams. Recently extended this into AI-native engineering — shipping a production LLM-integrated streaming assistant and building the UI, database layer, and authentication for a multi-tenant RAG chatbot platform.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, AngularJS, Redux, GraphQL, Tailwind CSS, Material UI (MUI), Bootstrap, Sass/Less, PWA

Backend & Data: Node.js/Express, Prisma, PostgreSQL, MongoDB, MySQL, Supabase, Firebase/Firestore, REST APIs, WebSocket/Realtime APIs

Auth & Security: OAuth 2.0, Keycloak, JWT/JWKS, Role-Based Access Control (RBAC)

AI / LLM: Gemini API, Retrieval-Augmented Generation (RAG), pgvector, LLM Streaming (SSE), Prompt & Context Engineering

DevOps & Cloud: Docker, Azure DevOps Pipelines, Jenkins, AWS, Git, CI/CD

Testing & Quality: Jest, React Testing Library, Cypress, Sentry

Leadership: Team Hiring & Mentoring, Sprint Planning, Code Reviews, Technical Roadmapping

EXPERIENCE

Software Architect – Frontend — CoffeeWeb Technologies

Remote · Bengaluru | Aug 2023 – Present

- Defined frontend system architecture and technology stack from scratch for a mobile-first PWA spanning 16 product domains, serving 200,000+ users across 175+ countries in English, Hindi, and Kannada.
- Led end-to-end delivery of core platform interfaces using React.js, Next.js, TypeScript, and Node.js, including real-time market data via WebSockets.
- Built tiered subscription and monetization flows (Regular, Gold, Platinum) integrating Razorpay, PayPal, Stripe, and Google OAuth login.
- Adopted Supabase (Postgres + realtime) and Firebase (Auth, Firestore, push messaging) to power live chat, notifications, and real-time data feeds.
- Established the team's testing and quality foundation (Jest, React Testing Library, ~165 test files) and Sentry-based production monitoring; owned CI/CD via Azure DevOps Pipelines.
- Led hiring, mentoring, and sprint execution for the frontend engineering team.

Lead Frontend Engineer — Peppo Technologies

Remote | Aug 2020 – May 2023

- Led frontend engineering from the ground up for BookMyShow Deals, the Peppo PWA food-ordering app, and a suite of B2B consoles (Merchant, DMS, RewardX).
- Architected the Merchant Console for live order processing and the geographically-mapped DMS Console for partner onboarding.
- Engineered the mobile-first Peppo PWA and Event Ordering reservation flow using Vue.js, TypeScript, and Node.js.
- Integrated secure checkouts and real-time merchant discount workflows for the BookMyShow Deals consumer interface.
- Collaborated cross-functionally with product, backend, and design to translate complex product logic into interactive UIs.

Software Engineer, R&D — JFrog India

Bengaluru | Mar 2019 – Jul 2020

- Part of the JFrog Pipelines team from inception, building the product's UI from scratch using Vue.js, TypeScript, and Node.js.
- Integrated JFrog Pipelines into platform-ui, JFrog's unified product platform used by Amazon, Google, Netflix, and 4,500+ companies.

Software Development Engineer — Shippable India

Bengaluru | Mar 2018 – Mar 2019

- Built parts of a CI/CD platform spinning up 100,000+ Docker containers monthly in production, using AngularJS and Node.js.

Software Developer — CenturyLink India

Bengaluru | Mar 2016 – Feb 2018

- Built CenturyLink's e-commerce ordering platform (Java, JavaScript, Velocity) and the mobile-first Instalink site (AngularJS, Bootstrap).

SELECTED PROJECTS

Ask AI — Portfolio Assistant

- Streaming LLM chat assistant built on the Gemini API; grounded via server-side context stuffing, streamed over SSE/ReadableStream, with per-IP rate limiting and server-side filtering of private content.

YourBot — Multi-Tenant RAG Chatbot Platform

- Multi-tenant SaaS platform for building and embedding custom RAG chatbots. Built the Next.js bot-creation wizard UI, the Prisma/PostgreSQL schema (tenants, bots, documents, ingestion jobs, subscriptions), Keycloak authentication (JWKS-verified JWT, RBAC), and the pgvector-backed retrieval configuration and ingestion-pipeline UI.

Venue Management Console

- B2B back-office console for restaurant/venue operators (sales dashboards, item library, role-based user management, table management). Rebuilt the frontend from Angular to React (MUI, react-admin, React Router) end to end.

EDUCATION

Diploma in Advanced Computing (PG-DAC) — C-DAC ACTS, Bangalore — 2016

Bachelor of Engineering — Oriental College of Technology, Bhopal (RGPV) — 2015

All roles, metrics, and projects above are verifiable against my portfolio and GitHub.
