SUMMARY

Lead Software Engineer and Frontend Architect with 10+ years of experience building and scaling production web platforms across consumer, B2B SaaS, e-commerce, food tech, DevOps, and market intelligence. Hands-on engineer with deep expertise in React, Next.js, TypeScript, frontend architecture, web performance, real-time applications, and modern web platforms. Currently lead a 9-person frontend engineering team while remaining hands-on across architecture, technical implementation, production reliability, hiring, mentoring, and delivery. Experienced in building products from scratch and re-architecting existing systems, with recent hands-on work extending into AI-native applications, LLM streaming, and multi-tenant RAG platforms.

CORE EXPERTISE

Frontend Engineering: React, Next.js, TypeScript, JavaScript, Redux, Redux Saga, Zustand, TanStack Query, Vue.js, AngularJS

Frontend Architecture: Application Architecture, Component Architecture, Design Systems, State Management, Micro-frontends, Module Federation, BFF, API Integration

Modern Web: SSR, Server Components, Client Components, Server Actions, PWA, Service Workers, Workbox, WebSockets, SSE/Streaming, i18n, SEO, Accessibility

Performance: Code Splitting, Lazy Loading, Dynamic Imports, Bundle Optimization, Dependency Optimization, Caching, CDN, React Rendering Optimization, Virtualization, Core Web Vitals

Backend & Data: Node.js, Express, Prisma, PostgreSQL, MongoDB, MySQL, Supabase, Firebase, MinIO

Security & Integrations: OAuth 2.0, JWT/JWKS, RBAC, Keycloak, Stripe, PayPal, Razorpay

AI / LLM: RAG, pgvector, LLM Streaming, Gemini API, Prompt & Context Engineering

Quality & Delivery: Jest, React Testing Library, Cypress, Sentry, Docker, Azure DevOps, Jenkins, Git, CI/CD

PROFESSIONAL EXPERIENCE

CoffeeWeb Technologies

Software Architect – Frontend

Aug 2023 – Present | Remote

React · TypeScript · JavaScript · Node.js · WebSockets · Supabase · Firebase · PWA · Sentry

- Lead a 9-person frontend engineering team, owning technical direction, architecture, sprint planning, OKRs, task allocation, performance reviews, hiring, mentoring, and production delivery while remaining approximately 60% hands-on with engineering.
- Architected and evolved two React applications from the ground up — the customer-facing CoffeeWeb platform and CoffeeWeb Admin Console for managing platform content, news, market information, and operational data.
- Led frontend architecture for a 16-domain mobile-first PWA serving 200K+ users across 175+ countries, covering real-time market data, pricing, industry reports, weather, news, community, AI assistance, trade/exchange, and subscriptions.
- Re-architected an immature frontend codebase with oversized components, duplicated logic, direct API calls from UI components, inconsistent props/state patterns, uncontrolled re-renders, poor separation of concerns, and limited error handling; established structured application architecture, reusable patterns, state/data-management conventions, API boundaries, and production observability.
- Built and maintained the Node.js market-data service supporting CoffeeWeb's live-data pipeline, including authenticated external-data collection, market-data processing, persistence, currency processing, and downstream event publishing.
- Designed frontend integration for real-time market experiences, consuming continuously updated data through WebSocket/realtime APIs and powering live quotes, market indicators, and charting experiences.
- Built tiered Regular, Gold, and Platinum subscription flows, integrating Razorpay, PayPal, Stripe, trial management, feature gating, and Google OAuth.
- Established the frontend quality and production-reliability foundation with Jest, React Testing Library (~165 test files), ESLint, Prettier, Husky/lint-staged, Sentry, and Azure DevOps CI/CD across development, staging, and production.
- Drove frontend performance and reliability improvements across code splitting, lazy loading, dependency optimization, caching, React rendering, API efficiency, WebSocket handling, and Core Web Vitals.

Peppo Technologies

Lead Frontend Engineer

Aug 2020 – May 2023 | Remote

Next.js · TypeScript · JavaScript · Node.js · REST APIs · PWA · Sentry

- Lead frontend engineering across multiple consumer and B2B products including BookMyShow Deals, Peppo PWA, Event Ordering, Merchant Console, DMS, and RewardX.
- Engineered the mobile-first Peppo food-ordering PWA and Event Ordering reservation experience using Next.js, focusing on performance, smooth interactions, and reliable transactional workflows.
- Architected and delivered B2B operational consoles supporting real-time order processing, merchant operations, partner/outlet onboarding, geographic mapping, and loyalty workflows.
- Built consumer-facing BookMyShow Deals experiences integrating checkout/payment workflows and dynamic merchant discount functionality.
- Led frontend architecture, implementation, code reviews, technical decisions, and cross-functional delivery across product, backend, and design teams.

JFrog India

Software Engineer, R&D

Mar 2019 – Jul 2020 | Bengaluru

Vue.js · Vuex · TypeScript · JavaScript · Node.js

- Joined the JFrog Pipelines team from inception and helped build the product UI from scratch using Vue.js, TypeScript, JavaScript, and Node.js.
- Built and integrated JFrog Pipelines into the unified platform-ui, collaborating across engineering teams to deliver CI/CD orchestration experiences.

Shippable India

Software Development Engineer

Mar 2018 – Mar 2019 | Bengaluru

AngularJS · JavaScript · Node.js · HTML5 · Bootstrap · Sass

- Contributed to a highly scalable CI/CD and DevOps platform supporting 100K+ Docker containers spun up monthly in production.
- Built frontend and platform functionality across CI/CD workflows using AngularJS, Node.js, JavaScript, HTML5, Bootstrap, and Sass.

CenturyLink India

Software Developer

Mar 2016 – Feb 2018 | Bengaluru

Java · JavaScript · Velocity · AngularJS · Bootstrap

- Built and enhanced customer-facing e-commerce experiences for CenturyLink's online ordering platform, integrating backend web services using Java, JavaScript, and Velocity.
- Developed the mobile-first Instalink experience using AngularJS and Bootstrap.

SELECTED ENGINEERING PROJECTS

YourBot — Multi-Tenant RAG Platform

Next.js · TypeScript · Prisma · PostgreSQL · MinIO · Keycloak · pgvector

- Built the application layer for a multi-tenant RAG SaaS platform, owning tenant/team management, bot creation and configuration workflows, document management, and integration with backend AI services.
- Designed the Prisma/PostgreSQL data model covering tenants, bots, documents, ingestion jobs, and subscription-related entities.
- Implemented Keycloak authentication and RBAC, including JWT/JWKS-based authentication flows.
- Built document-management workflows using MinIO for object/document storage, with frontend experiences for ingestion and processing status.
- Built configurable RAG/bot experiences allowing users to define bot behaviour, branding, configuration, and retrieval-related settings.

Ask AI — Streaming LLM Assistant

Next.js · Gemini API · SSE/ReadableStream · Context Engineering

- Built a streaming LLM assistant using the Gemini API, grounding responses through server-side context assembly.
- Implemented streaming responses using ReadableStream/SSE, with server-side filtering of private content and per-IP rate limiting.

Venue Management Console

React · MUI · react-admin · React Router

- Rebuilt a B2B venue-management application from Angular to React, covering dashboards, item management, role-based user management, venue operations, and table management.
- Designed reusable React-based interfaces and integrated JWT-authenticated backend APIs.

TRAINING UNDERGONE

- Four Weeks Industrial Training with BSNL, Bhopal on Basic Telecom.
- Four Weeks Training with HCL CDC, Bhopal on Cisco Certified Network Associate.

EDUCATION

PG-DAC — C-DAC ACTS, Bangalore | 2016

Bachelor of Engineering — Oriental College of Technology, Bhopal | 2015
